OBJECTIVE

Motivated undergraduate reading for a BSc in Physical Science & ICT, with hands-on experience building full-stack Java applications, numerical computing tools, and web-based projects. Comfortable across the stack from database design to user interfaces, with a strong grounding in object-oriented design, software testing, and mathematical problem-solving. Seeking opportunities to apply and grow these skills in a software development or data-focused role.

EDUCATION

BSc (Hons) in Physical Science & Information & Communication Technology

2024 – Present

University of Sri Jayewardenepura, Sri Lanka

- Core coursework: Object-Oriented Programming (Java), Numerical Methods, Database Systems, Electronics & Physics, Linear Algebra.
- Relevant final assignments include a full GUI-based Sales Management System and a Numerical Methods Solver (details below).

TECHNICAL SKILLS

Programming Languages	Java, Python, JavaScript, C (Basics)
Web Development	HTML5, CSS3, JavaScript, Java Swing (GUI), React (Learning)
Databases & Tools	SQLite, MySQL, Git & GitHub, Maven, NetBeans, JUnit 5, Linux/Terminal, VS Code
Mathematics & Science	Linear Algebra, Numerical Methods, Electronics, MATLAB (Basic)
Currently Learning	React.js, Kubernetes Fundamentals

ACADEMIC & PERSONAL PROJECTS

Sales Management System — Desktop GUI Application

2025

Final Assignment, Object-Oriented Programming (ICT 1062)

- Designed and built a complete GUI-based sales management system following the MVC architecture, spanning 23 source files.
- Implemented persistent storage with SQLite and validated core logic with 8 passing JUnit 5 test cases.
- Authored supporting ERD and class diagrams, a technical report, and a demo walkthrough.

Tech stack: Java, Java Swing, SQLite, Maven, NetBeans, JUnit 5

Numerical Methods Solver

2025

Personal Project — Applied Numerical Methods (MAT 2032)

- Built an interactive solver implementing root-finding methods (Bisection, Newton–Raphson, Secant) and interpolation techniques (Lagrange, Newton's Divided Differences, Hermite) with step-by-step output.

Tech stack: Python

Database Concurrency Study Tool

2025

Personal Project — Database Systems

- Developed a study resource and interactive quiz covering transaction management and concurrency control, including ACID properties, locking mechanisms, MVCC, and deadlock resolution.

Tech stack: SQL, HTML/JavaScript

Personal Portfolio Website

2025 – Present

heshancampus1028-dev.github.io/Heshan_Madhuwantha

- Designed and built a multi-page personal portfolio from scratch, including a dark/light theme system, scroll animations, an interactive skills and music timeline, and a working contact form.
- Deployed and iteratively maintained via GitHub Pages.

Tech stack: HTML, CSS, JavaScript, Git/GitHub

CREATIVE & EXTRACURRICULAR ACTIVITIES

Pianist & Chorister

Grade 8 – Present

St. Anthony's Church, Nittambuwa

- Accompany and sing at liturgical services on piano and as part of the choir.

Leader & Keyboardist

2025 – Present

RHYTHMS (Music Band)

- Lead the band and manage musical arrangements for live performances.

Chorister

2025 – Present

Archdiocese of Colombo Choir

- Perform at major canonical and community-wide religious events.

Western Band & College Choir Member

Grade 3 – 11

St. Peter's College, Colombo – 04

- Built strong instrumental and vocal foundations through sustained participation in school ensembles.

PERSONAL INFORMATION

Date of Birth: October 28, 2003 | **Nationality:** Sri Lankan | **Languages:** Sinhala (Native), English (Fluent)
